

America in Space, from Mercury to Apollo

To register: 305-919-5900

Course

During the 1960s and early 1970s, Americans and the world were thrilled by the exploits and explorations of the astronauts who flew the Mercury, Gemini and Apollo space and moon missions. Join Sylvia Gurinsky for a three-part look at those achievements. You'll meet the science icons, political leaders and men and women who overcame adversity and tragedy, and turned "One small step for man" into one of humankind's greatest achievements.
