

Technology Through the Years

To register: 305-919-5900

Course

During this presentation, attendees will hear about the evolution of technology as experienced first-hand by the presenter. From working with punch card computers in the early 1960's to wearable computers in 1995 and the development of a wearable computer for children with disabilities, Richard will take you back in time. Having been one of the first users of many of today's technologies we now take for granted, Richard will share some of the developments experienced within the tech industry. He has knowledge in many areas including Wi-Fi, RFID, speech technologies, OBD2 (car diagnostics), and GPS.
